

School Student Visit

Around 35 students from **Adarsh Vidyalaya, Badlapur, Mumbai** had an inspiring and educational visit to the Institute of Chemical Technology (ICT) in Mumbai on 7th October 2023. Here's a brief summary of their visit:

1. Warm Welcome: The visit began with a warm welcome from Registrar Prof. R. R. Deshmukh, Prof. S. V. Joshi, and Dr. Maity.

2. Lab Tours: The students were divided into groups and taken for a tour of various departmental laboratories. These tours likely included observing and learning about the experiments and research being conducted at ICT. This hands-on experience had given the students a firsthand look at laboratory working conditions and the kind of research taking place.

3. Gaining Insights: The students gained valuable insights into the laboratory conditions and the overall research environment at ICT. This firsthand exposure to scientific research inspired these young minds to pursue further studies and careers in science and technology.

4. Motivation: As a result of this visit, the students left ICT highly motivated. Exposure to advanced research facilities and interactions with professionals in the field often serve as a catalyst for students to consider pursuing higher education and careers in science, technology, engineering etc.

This kind of educational visit can have a significant impact on students, as it helps bridge the gap between theoretical learning in the classroom and real-world applications in research institutions. It can also serve as a source of motivation and encouragement for students to aim for higher studies and careers in science and technology.
